

YURII KOVANZHY

SOFTWARE DEVELOPER

/ABOUT ME

A highly skilled Senior Software Developer with extensive experience in collaborative environments, specializing in the development and integration of high-quality software solutions. Proficient in multiple programming languages and tools, showcasing flexibility throughout the software application development cycle. Shows outstanding communication and problem-solving abilities. Holds Bachelor's and Master's degrees in Computer Science.

/ WORK EXPERIENCE

>> Senior Fullstack Engineer

B2B Contractor | March 2025 - Present

- > Build high-quality web enterprise applications, modular monoliths, and microservices that streamline internal processes for a range of industries, covering the entire DTAP lifecycle from environment configuration to stable releases and ongoing maintenance.
- > Manage the complete development stack from front-end to back-end applying modern practices like Clean Code, SOLID principles, Domain-Driven Design (DDD), Dependency Injection, Test-Driven Development (TDD).
- > Harness .NET/.NET Core, React, MSSQL/PostgreSQL, Docker, Azure, and robust CI/CD pipelines to ensure reliable, maintainable solutions.
- > Actively employ AI-driven tools to uphold top-tier code quality, stay aligned with evolving industry standards, and seamlessly integrate AI capabilities into software solutions when needed.

>> .NET Lead Developer

eConfaire ID | September 2023 - March 2025

- > Managing a team to design and deliver high-quality web software solutions.
- > Utilizing technologies: .NET/.NET Core, C#, EF, Blazor, JavaScript, PostgreSQL, SonarQube, SOLID, Clean Architecture, Visual Studio, Visual Studio Code, GitHub, Docker, GitHub Copilot and other AI assistants to facilitate the development of modern, high-quality software solutions.
- > Enhancing architectural design efficiency through innovative software.
- > Ensuring high standards of code quality and system performance.
- > Leading the design, development, and implementation of innovative .NET solutions, continuously optimizing software development flows and architectures to meet evolving client requirements.

>> Full Stack Developer

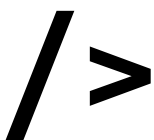

Expertware | March 2022 - January 2023

- > Exhibited consistent active involvement in all phases of software development, consistently advocating for a modular architecture and adhering to clean code principles to create robust and maintainable projects.
- > Delivered dependable, high-quality software solutions tailored to meet client requirements, leveraging a range of contemporary technologies such as .NET/.NET Core, EF, C#, VueJS, JavaScript, MSSQL, SSMS, Clean Architecture, SOLID, Visual Studio, and Visual Studio Code.
- > Explored and integrated other intriguing technologies to improve the development process and expand the functionalities of the software solutions delivered.

YURII KOVANZHY

SOFTWARE
DEVELOPER

>> R&D Software Developer

eConfaire ID | August 2020 - March 2022

- > Orchestrated a cross-functional team to plan, oversee, and carry out sprints through the Scrum methodology, ensuring seamless project coordination and successful outcomes.
- > Successfully developed and delivered top-notch, cross-platform software solutions using a wide range of technologies, including C++, wxWidgets, CUDA, OpenCV, Linux, MySQL, Apache, C#, and .NET.
- > Incorporated Microsoft Power BI, Power Automate, Power Apps, and other robust tools from the Microsoft Power Platform to deploy advanced business intelligence solutions, promoting data-informed decision-making processes.
- > Fostered a collaborative team environment, promoting effective communication and knowledge sharing.

>> C++ Developer

Cronoxy Soft | August 2019 - August 2020

- > Led the development of cross-platform GUI applications with a strong emphasis on quality, utilizing the powerful wxWidgets library to create graphical components for Windows and Linux systems.
- > Showcased expertise in utilizing advanced technologies, including OpenCV for sophisticated image processing, Curl for smooth data transfer, and the CUDA parallel computing platform for accelerated graphics data processing on NVIDIA GPUs.
- > Efficiently incorporated MySQL for robust database management and Apache server for effective web hosting capabilities into project structures.
- > Assumed the position of Project Manager, proficiently managing tasks like planning, organizing, and executing sprints using the Scrum methodology.
- > Dedicated to providing top-notch software solutions that combine innovation and efficiency, continuously striving to improve user satisfaction and business results.

>> Junior Full Stack Web Developer

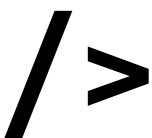

Cronoxy Soft | October 2018 - August 2019

- > Involved in Web Front-end development with Yii 2.0 Framework, crafting dynamic and user-friendly interfaces for seamless user experiences.
- > Proficient in Web Back-end development with Yii 1.1 Framework, building robust and efficient server-side functions to bolster web applications.
- > Handled, optimized, and maintained MySQL databases to ensure peak performance and data integrity.
- > Skilled in setting up, configuring, and managing Apache servers on Linux platforms, ensuring dependable web hosting solutions.
- > Implemented application integration with REST / SOAP and diverse APIs like Google Maps, social media logins, payment gateways, and other services to enrich application capabilities and features.

/ EDUCATION

>> "Ștefan cel Mare" University From Suceava

Master's degree |
Communication Networks and Computers |
October 2018 - July 2020

Conducted a dissertation on developing cost-effective automotive video recorders using AI, demonstrating feasibility and presenting potential industry applications.

>> "Ștefan cel Mare" University From Suceava

Bachelor's degree |
Electrical Engineering and Computer Science |
October 2014 - July 2018

Conducted a Bachelor's thesis on 'The Smart Home,' researching the potential to enhance security and living standards through home automation. Developed a mockup with integrated hardware and software as a result.
